3028 30 r. grey-black, Intermediate Impression, the famous used "semi-Xifopagus" block of six, from the right hand side of the top pane of 18 subjects with full horizontal and vertical margins on three sides from the first Composite Plate, State D (positions 5-6/11-12/17-18), good to huge margins all round and showing small portion of dividing line at base, cancelled by three centrally struck circular "PORTO ALEGRE / SUL" handstamps (Ayres fig. 1586) in black. Slight ironed bend on central stamps not affecting the dramatic appearance. Extremely rare with just three used multiples larger than four known: this without doubt being the finest of the three. A magnificent multiple for the connoisseur.

Fritz Heimbüchler

On 1 August 1843, Brazil issued its first postage stamps. Not wishing to obliterate the effigy of Emperor Dom Pedro II, the authorities directed a simple design for the stamps. Known as the Bull's Eyes, the 30, 60, and 90 reis stamps, were finely engraved in the Brazilian Treasury on an engine turned background and are considered to be among the most beautiful of Classic stamps. The Bull's Eye stamps from Brazil are the first stamps from the whole American continent.

Offering the only recorded piece with all three values and 2x 90 REIS.

Among very many Gems, it's a very rare opportunity to buy one of only three recorded pieces with all three denominations on one and the same piece. Other than these three pieces, only one full letter is recorded to date. The high philatelic importance of this piece is reflected through its provenance prior to Heimbüchler, where it has been presented in no less than three different Grand Prix d'Honneur Collections, in LONDON 1980, in JAPAN 1992 and in LONDON 2000.
