PANAMA – THE CLASSIC PERIOD 1807–1904

THE ÁLVARO CASTRO-HARRIGAN COLLECTIONS

Álvaro Castro-Harrigan, is a Costa Rican Philatelist, Entrepreneur and Educator. Álvaro began collecting at the age of seven and is a founding member of the Costa Rica Revenue and Postage Society, and is also a member of the Royal Philatelic Society of London, the American Philatelic Society, and the Society for Costa Rica Collectors. He has contributed and authored many philatelic publications and is a member of the Association Internationale des Journalistes Philatéliques. Among these publications are Costa Rica Travelling Post Offices (2009), Costa Rica, Imágenes e Historia (two volumes - 2006) and Postage Stamp Album of Costa Rica 1863-2009 (three volumes).

Álvaro has formed important collections of Costa Rica and Panama, winning much philatelic recognition and several major awards. Most noteworthy is his achievements with his Classic Panama exhibit, which has won three International Large Gold medals; in Russia 2007, China 2009, and Portugal 2010. Both his Costa Rica and Panama collections are considered to be one of the best ever formed.

The Panama collection is without doubt the most comprehensive ever assembled and is the most expansive study of this fascinating and strategic country, plotting, through stamps and covers, the journey of a nation through the Colonial pre-philatelic period, the Colombian postage issues used in Panama, the Sovereign State, to the emergence as an independent Republic and the Canal construction.

It is an assembly of three eight frame exhibits (384 pages), comprising all the important and unique pieces and includes many discoveries which were uncovered by Álvaro during the 40 years of dedicated study. It contains many exemplary items with great philatelic pedigree, with material from the great collectors of Latin America, such as; Ehrman, Lange, Londoño, Cross, Helme, de Voss, Kornan, Bollen, Hubbard, Castillejo, Frohlich, and Santa-Maria.

Much of his research has been developed in collaboration with the key study groups and societies and the basis of the survey data is derived from the Copacarta and The Main Sheet, as well as building upon the work of Dr Helme and other postal historians specialising in Central and South American philately. This is the most significant sale of Classic Panama material ever offered through auction and is a unique presentation unlikely to ever be repeated again in the future.

Note: These Provisional overprints, applied with a rubber stamp in violet ink, may have been a solution to a brief shortage of 20c and or 5c postage, performed by a district postmaster without official authorisation. A cover from the same correspondence franked with a 20c dated 16 October 1888 is the earliest known use of this value. This may suggest that this first delivery of 20c value was used between these two dates.
