Small Crown, perf. 16, lettered AA-AL / CA-CL / DA-DK / EA-EG plus EJ-EK, the irregular re-joined block of fifty-six of good rich colour, all struck by italic **"Frank Ives Scudamore / Chief Examiner"** handstamps in black, top right stamp with diagonal crease but largely fresh and fine, with soiling on large part og. A rare and extraordinary large multiple.  
*Note: Frank Ives Scudamore (1823-1884) served with the Post Office from the age of 18. When the Offices of Accountant-General and Receiver-General were combined in 1852 Scudamore was appointed Chief Examiner of the combined new Department at Somerset House. He applied his handstamps as a method of defacement, normally to sheets of stamps that had been mis-perforated by Perkins Bacon. The above block ably demonstrates this. ## Pick of the Pack

### IGNORED RARITY: Interpanneau Multiples

The arrangement of printing plates of the 3d., 6d., 9d., 10d., 1s. and 2s. Surface Printed Issues was divided in “panes” of 20 stamps until the re-arrangement of plates with the introduction of Crown Watermark paper in 1880/81. In between the panes was an “Interpanneau Margin” showing individual imprints. Each pane of 20 represented a Post Office sheet and single panes of 20 were delivered to the P.O.’s on demand. For the 3d. and 6d. the situation was different. Each P.O. sheet consisted of 40 stamps in two panes of 20, confirmed by the imprint between the two panes reading “...per sheet of 40”. As such they were delivered to the P.O.’s which could sell “Interpanneau” pairs or blocks to the public.

In practically all philatelic countries such “Interpanneau” pairs or blocks are celebrated and most valuable philatelic gems. Not so for British stamps, although hardly a dozen “Interpanneau” multiples seem to have survived. A summary of what is known based on Karl’s Card Index:

- 1862, 6d. plate 4, mint block of six EI/FK in Bob Gallands collection.
- 1864, 3d. plate 4, mint block of twelve, NI/PL, ex Trivett coll. (1924), now in ever lasting prisonship in the NPM London.
- 1871, 3d. plate 5, the Griffiths (1981) & Chartwell (2012) mint vertical pair EI/FL.
- 1871, 3d. plate 5, mint vertical strip of three (letterings unknown), last seen in 1948. Very likely now reduced and identical with the Griffiths/Chartwell pair.
- 1871, 3d. plate 5, mint “part sheet of thirty-two stamps” (letterings: ?), Cheverley & Co. auction 1896 (!), never seen since.
- 1871, 3d. plate 6, the Seymour (1951), Burrus (1963), Dale (1969), Baillie (2012) and Bertsimas (2019) mint block of sixteen, MA/PD.

- 1871, 3d. plate 7, the Maximus (1970) & Fischer (1983) mint block of six, OJ/PL.
- 1871, 3d. plate 7, the unique used (!) block of four EI/FJ, presently in Ray Simpson’s celebrated ‘Stamp Perforation’ collection.
- 1873/80, 3d. plate 18, OI/PL, mint block of eight.
- 1873/80, 3d. plate 18, mint block of forty (lettering unknown) with perfin ‘ADAM’. Offered on Harmer’s auction in 1935 and never seen since. Most likely split up without preserving any “Interpanneau” multiples.
- 1876, 6d. pl. 15, unused block of eight, OE/PH
- 1876, 6d. plate 16, mint block of sixteen, NE/ QH (1957), now reduced to a block of twelve, OE/QH.

The last and the most recently found ‘Interpanneau’ multiple on Karl’s list is one of the finest surviving. It was found in an envelope in 1991/92 and is an irregular mint block of twelve, ex positions OA/RD lacking OC, OD, QD and RD. This marvellous multiple found its way into the BESANÇON collection and will be offered by Corinthila in the 4th part of the BESANÇON collection in May 2022.

- 4722 Jackson - Harmsworth Arctic Expedition 1881:** 1 d. lilac (2), Jubilee 1887/92 ½ d. vermillion and 2 d. green & carmine tied to registered 1896 cover with complete contents, mailed by Reginald Koettlitz from "**Elmwood, Cape Flora, North Brook Island, Franz Josef Land**", tied by "West Strand / London" cds's (Sept 8) in black. The enclosed letter (full transcript with the lot) was written on July 31, 1896 and describes the famous meeting with the Norwegian explorer **Fridtjof Nansen** and his sole companion, Lieutenant Hjalmar Johansen, who had been living entirely on walrus and polar bear for over sixteen months in the Arctic circle; and also thanks the British Vice-Consul in Archangel, Henry Cooke for his letter and assistance. Mailed from the UK (possibly by the returning zoologist Harry Fisher) and received in Archangel on Sept 18 with red manuscript docketing of receipt and Archangel cds on reverse (Sept 5, julian = Sept 17 gregorian). A rare and extraordinary cover.

*Note: The Jackson-Harmsworth expedition of 1894-1897 to Franz Josef Land was led by British Arctic explorer Frederick George Jackson and financed by the newspaper proprietor Alfred Harmsworth. Jackson had been misled by false maps into believing that Franz Joseph Land was a land mass that extended to the North Pole. The survey, which was the main work of the expedition eventually proved that the land was in fact an archipelago, whose northernmost island stretched no further than 81° N. The expedition party consisted of astronomer and meteorologist Albert Armitage, physician and geologist Reginald Koettlitz, mineralogist J.F. Child, and botanist and zoologist Harry Fisher—who in 1896 was replaced by William S. Bruce.*
