The ‘BESANÇON’ Collection

This wonderful collection
– built over the last 45 years –
will be auctioned by Corinphila in 2019-2023

The ‘BESANÇON’ collection is a marvellous ‘traditional’ collection of this popular area, with Essays, Proofs, issued stamps, large multiples and interspersed throughout with ‘philatelic gems’ chosen by the collector both for their rarity and aesthetic appeal.

Like the Classic France, Australian States and Cape of Good Hope collections also sold by Corinphila, quality was of paramount importance to ‘BESANÇON’ and the following pages provide just a small extract from this outstanding collection.

1848/53, Experimental forms of separations by Henry Archer

The idea of a quick and easy method of separating stamps without knives or scissors was proposed by the Irish businessman and inventor Henry Archer in 1848. He first constructed two rouletting machines but it soon turned out to be a failure. Finally he constructed a third machine based on the principle of perforation.

1855, One Penny Red, die II, plate 2, variety imperforated, on cover to Australia.

Provenance:
Found by Robson Lowe in 1947
Described in ‘The British Philatelist’ (Oct. 1947)
Illustrated in Robson Lowe Encyclopaedia (1952) on page 160:
“....possibly the rarest piece known in line-engraved Great Britain....“
1858/79, One Penny & Two Pence with letters in all four corners

Starting with the 2d. plate 7 in 1858 and the 1d. plate 71 in 1864 the design was modified by having Letters in all four corners (instead of Stars in the upper corners) and the plate numbers incorporated in the design. It was felt that repeating the lower corner letters in the upper corners but in reverse would discourage the practice of cutting up used stamps and re-using the uncancelled halves as a ‘re-united’ unused postage stamp to defraud the Post Office. New values of ½d. and 1½d. were issued in 1870 for postcards and printed matter rates.

1864, One Penny Red, the very rare ‘last’ plate 225, mint block and adjoining single.
Provenance:
ex Michael Stephens (1937 – as a block of six)

1870, ½d. rose-red. The largest mint block from the very rare plate 9 in private hands (the only larger block recorded is in the Royal Collection).
Provenance:
R Lowe Auction (1940 – as an irregular block of 13)
1847/54, The Embossed Values

Due to an increasing number of letters going abroad, it was decided to issue higher denominations of 1s. (1847 – mainly for mail to the United States), 10d. (1848 – mainly for mail to France) and 6d. (mainly to pay 6d. Registration Fee). Special printing dies were produced with ‘raised portions’ of the design („Embossing”) to prevent counterfeiting the new high value stamps. A further measure against counterfeiting was the use of Dickinson silk tread paper for the 10d. and 1s. adhesives. The ‘Embossed’ stamps were printed ‘one by one’ at Somerset House.

1847, 1s. pale-green, colour trial from the unfinished die ‘without pendant curl’.

Provenance:
Christies Auction (1995)
1855/83, Surface Printed Issues
1855/57, ‘No Corner Letters’ and 1862, ‘Small Corner Letters’

Since the 1847/54 ‘Embossed Issues’ were found to be too expensive to print and inappropriate to perforating it was decided to print new adhesive stamps by Surface printing. Thomas De La Rue & Co. of London, the then leading printers in Surface printing technology, were chosen to print all values above 2d. during the reign of Queen Victoria, while Perkins, Bacon & Co. continued to print the Line engraved ½d., 1d., 1½d. and 2d values until 1880. Corner Letters for new plates of the Surface printed values were approved in 1860 and issued from 1862.

1867/83, High Values

The first ‘High Value’ postage stamp was a 5 Shillings stamp in 1867, larger in size than the ‘Low Values’ from 2½d. to 2s. In 1878, two ‘High Value’ stamps of 10s. and £1 followed. In 1882 printing plates were reduced from four panes of 20 (= 80 stamps) to one plate of 56 stamps. With the introduction of the new printing plates the watermark was changed from ‘Maltese Cross’ to ‘Large Anchor’ . Mint 5s., 10s. and £1 stamps are among the rarest stamps not only in GB philately, but also in traditional Classic Philately of any European or Overseas country!

1883/91, High Values

In December 1882 De La Rue submitted new designs for the ‘High Values’ with new inscription ‘POSTAGE – REVENUE’ (instead ‘POSTAGE’ only). Although the use of Corner Letters as part of the design added considerably to the expense of printing plate production, the system of individual Corner Letters for each stamp remained unchanged as a measure for security to avoid use of uncancelled re-joined left and right half stamps to defraud the Post Office.

1883/1884, ‘Lilac and Green’ Unified Issue

The 1884 ‘Lilac & Green’ Issue provoked a public outcry of disdain for this new issue of stamps, more or less ignored by the Government. When it was pointed out that the Revenue might suffer from inability to check correct value of stamps due to uniform green or lilac colours, reaction came immediately. The Post Office had the task of checking frankings under difficult artificial lighting conditions not aided by different values in identical colours.

1884, 3d. lilac, variety imperforate. Just six imperforate 3d. recorded, a single, a pair and this strip, all from the T-row!

1884, Unissued 5d. ‘with line under d’. Only 12 examples recorded!

1887/1901, Jubilee Issue

Following the public relations disaster of the 1884 ‘Lilac & Green’ issue, the Post Office issued newly designed bi-coloured stamps on white paper and one colour stamps on colour-tinted paper. The new issue appeared in 1887 when Queen Victoria celebrated her 50th Anniversary on the Throne, the issue became known as the ‘Jubilee Issue’.

1887, 2½d. variety imperforate between stamp and sheet margin, strip of three positions 4-6. The adjoining strip to the ‘MAXIMUS’ (R.A.G.Lee) strip position 7-9! Only one row of twelve originally existed which was split into four strips of three.

The Karl Louis "Card Index Register"

Describing Philatelic rarities calls for more than just quoting catalogue numbers and values. Provenance is a philatelic pedigree of former owners from the inception of philately until the present day. Those collections held in the highest esteem by their contemporaries and containing the great rarities, the modern day "Large Gold" exhibits, can be traced back to the collectors who once owned the particular rarity and the auctions where they were sold and changed hands. Frequently, the further back a philatelic pedigree goes, the more coveted the rarity becomes. Provenance is a quality seal. As in Art, Provenance is an indispensible attribute: in this case, of valuable Great Britain stamps and covers.

« Provenance is a quality seal. As in Art, Provenance is an indispensible attribute. »

The most comprehensive Provenance files of rare Great Britain has been meticulously maintained by Karl Louis AIEP, FRPSL, Corinphila's Managing Director. Karl started his Great Britain "Card Index Register" more than 35 years ago. Today it is – to the best of our knowledge – by far the most comprehensive and important census of British Stamps in the philatelic world.

All Provenances given for items offered in the "BESANÇON" Great Britain 1840 – 1910 collection are based on information from the "Karl Louis Card Index Register" and we will provide as much information on previous owners and sales as possible. We believe that this will benefit both potential buyers and future collectors in the "BESANÇON" series of auctions to be held at Corinphila. For further details, especially of what kind of items can be found in the "Card Index Register" see: www.corinphila.ch
